V.V.P. ENGINEERING COLLEGE
DEPARTMENT OF COMPUTER ENGINEERING
List of Experiments - A.Y. - 2025-2026 (EVEN)

Staff : Dr. Tejas Patalia / Prof. Bhavikchndra Bosamia / Prof. Vidhi Rajani / Prof. Kajal Paradva **Semester/Div : 4/GX/GY/GZ (EVEN)**

Subject : Operating System (3140702) **Batch: ------**

Sr. No.	Name of Experiment
1	1.1 Introduction & Study of various features of O.S. (CO-5) (U)
	1.2 Study of basic Linux commands. (CO-5) (U)
	1.3 Study of Advance commands and filters of Linux/UNIX. (CO-5) (U)
2	2.1 Study of Shell with its environment, Scripting & Features. (CO-5) (U)
	2.2 Write a shell script to find the sum & factorial of a given number. (CO-5) (U)
	2.3 Write a shell script to find if a given number is prime or not (CO-5) (U)
3	3.1 Write a shell script to find if the given string is Palindrom or not (CO-5) (U)
	3.2 Write a shell script to make a sum of digits of a given number. (CO-5) (U)
	3.3 Write a shell script to read n numbers as command arguments and sort them in descending order. (CO-5) (U)
4	4.1 Write a C program to create exactly 'n' child processes with use of fork() system call in Linux. (CO-5) (U)
	4.2 Write a C program to distribute logic/work among 'n' child processes created by fork() system call in Linux. (CO-5) (U)
	4.3 Write a C Program to create two child processes and run 'who' and 'ls' command in it with use of fork() and exec() system call. (CO-5) (U)
5	5.1 Write a C Program to create two threads for addition and subtraction of two large size array in parallel. (CO-5) (U)
	5.2 Write a C Program to create child processes for addition and subtraction of two large size array in parallel. Compare the parallelism achieved by Thread model and child Process model. (CO-5) (U)
6	6.1 Write a C programs to demonstrate the use of shared memory variables. (CO-5) (U)
	6.2 Write a C program to demonstrate and use of semaphores in Linux. (CO-5) (U)
7	7.1 Write a shell script to find max, min , average of given set of numbers. (CO-5) (U)
	7.2 Write a shell script to complete CD command which take one number as argument and moves that many levels up from the current directory. (CO-5) (U)
8	8.1 Write a shell script to mail a common message to all users who are currently logged in. (CO-5) (U)
	8.2 Write a shell script to display 5 largest files in the current directory. (CO-5) (U)
	8.3 Write a shell script to count how many files in a given directory. (CO-5) (U)
9	9.1 Write a C program to implement "ls" command in Linux. (CO-5) (U)
	9.2 Write a C program to implement "who" command in Linux. (CO-5) (U)
10	10.1 Write a shell script to translate all characters in File to upper case. (CO-5) (U)
	10.2 Write a shell script to change file extension (.txt) to (.doc) using for loop. (CO-5) (U)
	10.3 Write a shell script to compare two files to check whether they are same or not. (CO-5) (U)

Faculty
Prof. Bhavikchandra Bosamia
Prof. Vidhi Rajani
Prof. Kajal Paradva

HOD
Dr. T.P.Patalia
